Introduction

The College Performance Measurement Framework (CPMF)

The CPMF has been developed by the Ontario Ministry of Health (the ministry) in close collaboration with Ontario’s health regulatory Colleges (Colleges), subject matter experts and the public with the aim of answering the question “how well are Colleges executing their mandate which is to act in the public interest?” This information will:

1. Strengthen accountability and oversight of Ontario’s health regulatory Colleges;
2. Help Colleges improve their performance;

Each College will report on seven Domains with the support of six components, as illustrated in Table 1.

Table 1: CPMF Measurement Domains and Components

1	Measurement domains	→ Critical attributes of an excellent health regulator in Ontario that should be measured for the purpose of the CPMF.
2	Standards	→ Performance-based activities that a College is expected to achieve and against which a College will be measured.
3	Measures	→ More specific requirements to demonstrate and enable the assessment of how a College achieves a Standard.
4	Evidence	→ Decisions, activities, processes, or the quantifiable results that are being used to demonstrate and assess a College’s achievement of a standard.
5	Context measures	→ Statistical data Colleges report that will provide helpful context about a College’s performance related to a standard.
6	Planned improvement actions	→ Initiatives a College commits to implement over the next reporting period to improve its performance on one or more standards, where appropriate.

CPMF Model

The seven measurement domains shown in Figure 1 are the critical attributes that contribute to a College effectively serving and protecting the public interest. They relate to key statutory functions and organizational aspects that enable a College to carry out its functions well. The seven domains are interdependent and together lead to the outcomes that a College is expected to achieve as an excellent regulator.

Figure 1: CPMF Model for Measuring Regulatory Excellence

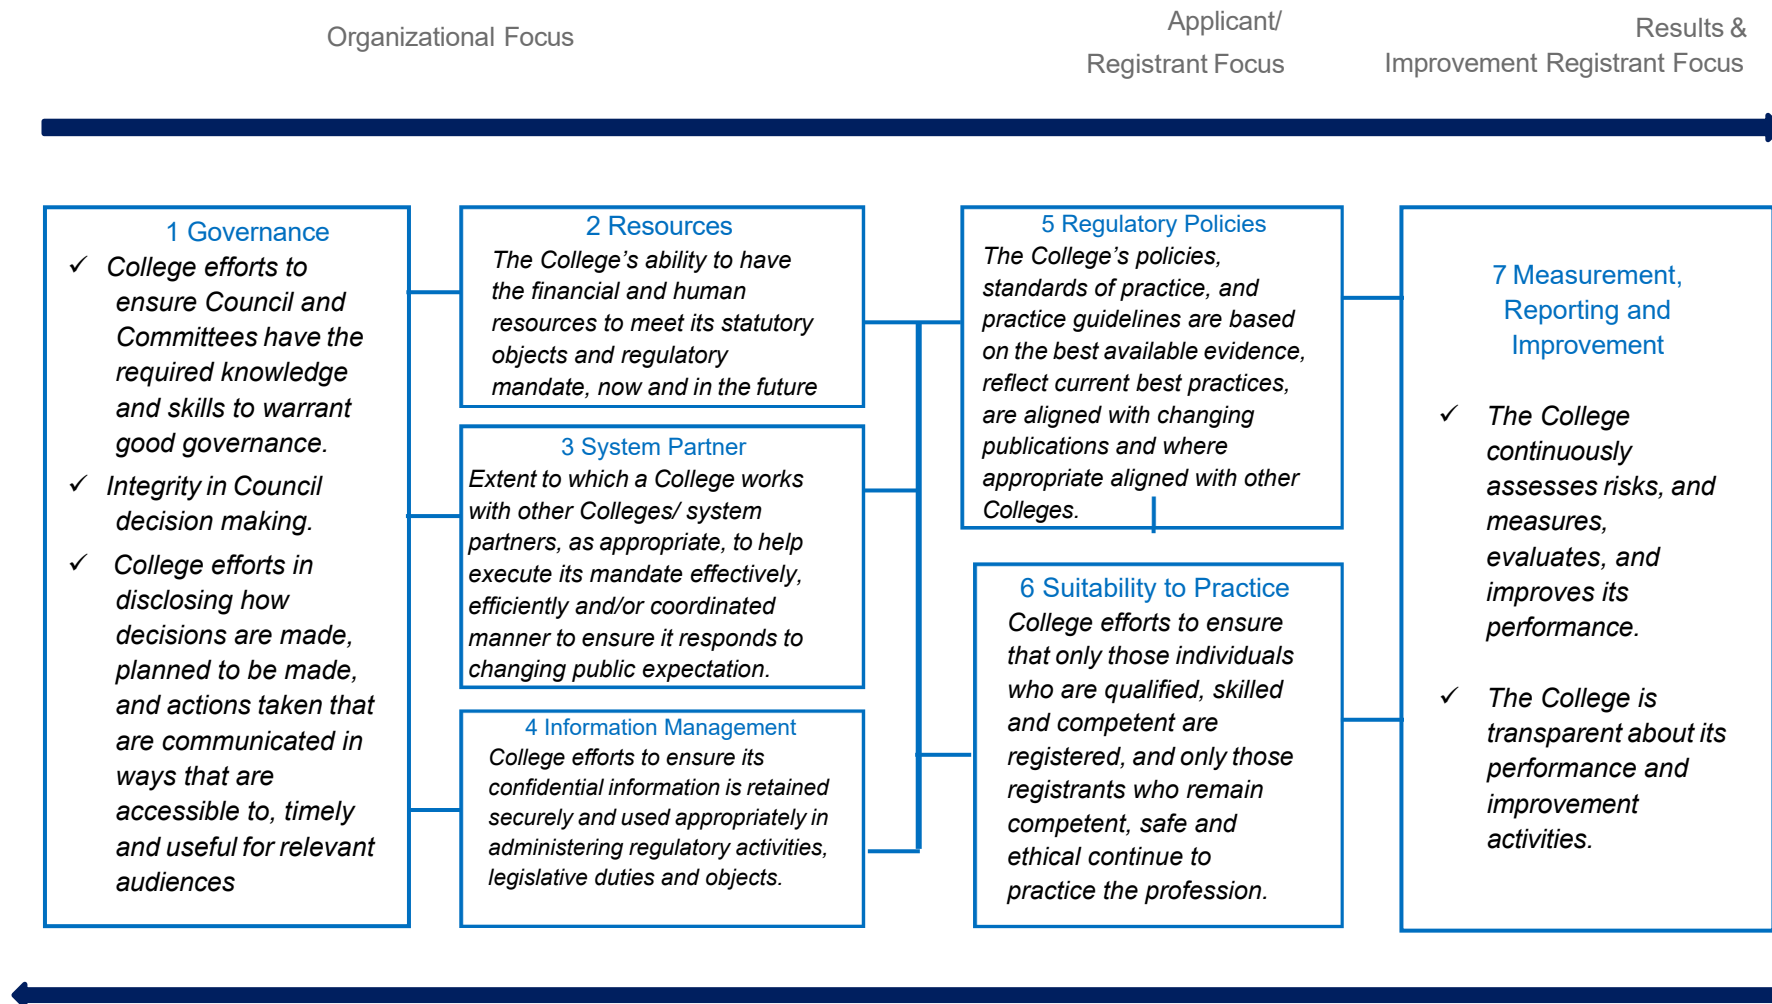

Figure 2: CPMF Domains and Standards

Domains	Standards
Governance	1. Council and statutory committee members have the knowledge, skills, and commitment needed to effectively execute their fiduciary role and responsibilities pertaining to the mandate of the College.
	2. Council decisions are made in the public interest.
	3. The College acts to foster public trust through transparency about decisions made and actions taken.
Resources	4. The College is a responsible steward of its (financial and human) resources.
System Partner	5. The College actively engages with other health regulatory Colleges and system partners to align oversight of the practice of the profession and support execution of its mandate.
	6. The College maintains cooperative and collaborative relationships responds in a timely and effective manner to changing public expectations.
Information Management	7. Information collected by the College is protected from unauthorized disclosure.
Regulatory Policies	8. Policies, standards of practice, and practice guidelines are based in the best available evidence, reflect current best practices, are aligned with changing public expectations, and where appropriate aligned with other Colleges.
Suitability to Practice	9. The College has processes and procedures in place to assess the competency, safety, and ethics of the people it registers.
	10. The College ensures the continued competence of all active registrants through its Quality Assurance processes. This includes an assessment of their competency, professionalism, ethical practice, and quality of care.
	11. The complaints process is accessible and supportive.
	12. All complaints, reports, and investigations are prioritized based on public risk, and conducted in a timely manner with necessary actions to protect the public.
	13. The College complaints process is coordinated and integrated.
Measurement, Reporting and Improvement	14. The College monitors, reports on, and improves its performance.

The CPMF Reporting Tool

The third iteration of the CPMF will continue to provide the public, the ministry, and other stakeholders with information respecting a College's activities and processes regarding best practices of regulatory excellence and, where relevant, the College's performance improvement commitments. At this time, the ministry will not assess whether a College meets or does not meet the Standards.

The information reported through the completed CPMF Reporting Tool may help to identify areas of improvement that warrant closer attention and potential follow-up. Furthermore, the reported results will help to lay a foundation upon which expectations for regulatory excellence can be refined and improved. Finally, the results may stimulate discussions about regulatory excellence and performance improvement among Council members and staff within a College, as well as between Colleges, the public, the ministry, college registrants/members, and other stakeholders.

Additionally, in 2022 the ministry developed a Summary Report highlighting key findings regarding the commendable practices Colleges already have in place, collective strengths, areas for improvement and the various commitments Colleges have made to improve their performance in serving and protecting the public as per their 2021 CPMF Reports. The focus of the Summary Report is on the performance of the regulatory system (as opposed to the performance of each individual College) and on areas where opportunities exist for colleges to learn from each other.

The ministry's Summary Report will be posted in English and French and weblinks to the report will be shared with the Colleges once it is published.

For this reporting cycle, Colleges will be asked to report on:

- Their performance against the CPMF standards and updates on the improvements Colleges committed to undertake in their previous CPMF reports;
- Provide detailed improvement plans where they do not fully meet a benchmarked Evidence.

Completing the CPMF Reporting Tool

While the CPMF Reporting Tool seeks to clarify the information requested, it is not intended to direct College activities and processes or restrict the way a College fulfills its fiduciary duties. Where a term or concept is not explicitly defined in the CPMF Reporting Tool, the ministry relies on individual Colleges, as subject matter experts, to determine how a term should be appropriately interpreted given the uniqueness of the profession each College oversees.

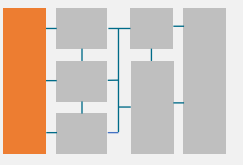

In the spirit of continuous improvement, if the College plans to improve its actions or processes related to a respective Measure or Evidence, it is encouraged to highlight these planned activities and progress made on commitments from previous years.

What has changed in 2022?

This year, eight pieces of Evidence have been highlighted within Part 1 of the Reporting Tool as ‘Benchmarked Evidence’. These pieces of evidence were identified as attributes of an excellent regulator, and Colleges should meet, or work towards meeting these benchmarks. If a College does not meet, or partially meets expectations on a benchmark, it is required to provide an improvement plan that includes the steps it will follow, timelines and any barriers to implementing that benchmark. In subsequent CPMF reports, Colleges will be expected to report on their progress in meeting the benchmarked Evidence.

Where a College fully met Evidence in 2021 and 2022, the College may opt to respond with ‘Met in 2021 and Continues to Meet in 2022’. In the instances where this is appropriate, this option appears in the dropdown menu. If that option is not there, Colleges are asked to fully respond to the Evidence or Standard. Colleges are also asked to provide additional detail (e.g., page numbers), when linking to, or referencing College documents.

Part 1: Measurement Domains

		Measure: 1.1 Where possible, Council and Statutory Committee members demonstrate that they have the knowledge, skills, and commitment prior to becoming a member of Council or a Statutory Committee.

Questions designed to ascertain the major strengths of the meeting, how the meeting could have been improved and if there was anything about the meeting that hindered the Council's work. If concerns are raised, Council members are invited to identify themselves for personal follow-up. Should issues arise from this survey, they would be discussed at the next Council meeting. 			<p><i>Additional comments for clarification (optional):</i></p> <p>In the Council’s 2022 planning survey, the matter of Diversity, Equity and Inclusion (DEI) was ranked as very important. Our College is actively supporting the work of the Health Profession Regulators of Ontario (HPRO) as it develops supports for Colleges to advance their work in DEI within their regulatory practices. The HPRO Anti-Racism in Health Regulation project provides valuable information for our College to use in understanding current issues and training needs related to DEI. Specifically, the September 2021 report commissioned by HPRO from Dr. Javeed Sukhera highlighted the following recommendations related to the needs for ongoing training:</p> <ul style="list-style-type: none"> • BE Thought Leaders: Regulators must work across traditional boundaries and divisions to be thought leaders in equity/anti-racism work. • TRAIN for the future: Activities that address equity and anti-racism must include education and awareness raising, however, must move beyond awareness raising towards skill development and action. <p>Current HPRO project activities are designed to provide a set of guiding indicators and support tools that our College will use in the next two reporting periods to engage our Council and Committee members in ongoing learning related to DEI. Specifically, we anticipate using the materials to evaluate our current strengths and gaps, for action planning and implementation to close key gaps.</p> <p>Additionally, within the next two reporting periods the College anticipates engagement with the Citizen Advisory Group, which may be helpful to inform public expectations in the areas of risk management and DEI.</p>

To that end, budget allocation should depend on the activities or programs a College undertakes or identifies to achieve its goals. To do this, a College should have estimated the costs of each activity or program and the budget should be allocated accordingly.</p>	<p>The College fulfills this requirement:</p> <p>Yes</p> <ul style="list-style-type: none"> Please insert a link to Council meeting materials that include discussions about activities or projects to support the strategic plan AND a link to the most recent approved budget and indicate the page number. Please briefly describe how resources were allocated to activities/projects in support of the strategic plan. <p>Agenda item 7.2, October 6, 2022 Council meeting (in camera)</p> <p>The CHO has a small human resource complement and a limited financial budget. All responsibilities are managed by a staff of four. One staff member is responsible for registration; one is responsible for communication and support to Council and Executive Committees and provides additional support as required. Two senior staff manage all other components of the College's activities and mandate and provide direction to support staff. Small teams of assessors have been contracted and trained to conduct substantially equivalent evaluation of applicants and academic program-based assessments.</p> <p>Staff support regulatory programs and Council and committee training, in addition to the tasks identified in the operating plan goals and objectives (OPGO), although in many cases there is an overlap between regulatory program needs and OPGO. The OPGO is tied to three Key Result Areas including: 1. CHO Effectively Delivers its Legislative & Legal Mandate; 2. CHO to Practice Good Governance; and 3. CHO to Achieve Growth (Growth = Profession, Supporting Institutions, CHO Membership Levels).</p> <p>Staff are supported by outside services in the areas of bookkeeping, legal, investigations and database support.</p> <p>The current CHO budget provides limited discretion for additional initiatives or expenditures. All activities undertaken must fit within the budget and existing staff complement. College work is somewhat variable as far as contingencies such as complaints which may not be predictable (e.g., the number of complaints received and when they arise, discipline cases resulting in investigations and hearings, and other directives from the Ministry or other external agencies). Consequently, any attempt to predefine human resources allocation can be challenging especially with a small staff.</p> <p>Nevertheless, for the 2022-2023 planning cycle an estimated staff time allocation was assigned to each identified goal and objective – both of those activities scheduled for completion and those activities identified as important but could not be completed due to a lack of resources. The final goals and objectives were identified following an extensive review of risk, impact, requirement, priority, and consideration of available/existing human resources. Following outcome review and some modifications, the College will continue to take this approach moving forward. While the financial budget does not delineate a breakdown by area or project, the planning tools clearly demonstrates the allocation of human resources.</p>

			<p><i>Additional comments for clarification (if needed)</i></p> <p>While it is certainly the intent of the College to achieve the level of reserves set out in policy, the ability to do so is largely contingent on factors outside its control, namely the number of new and returning registrants and the number of complaints received, new and ongoing investigations and files referred to Discipline Committee. In 2023, the College increased its fees at the rate of cost of living for the first time in five years. Additionally, following consultation, a credit card service fee will be incurred for those opting to pay by credit card, and payment by electronic transfer/direct deposit will be offered to registrants and applicants.</p> <p>The College has conducted a review of best practices employed by other RHPA colleges and will be developing a draft reserve policy for consideration by Council.</p>

<p>DOMAIN 3: SYSTEM PARTNER</p>		
<p>STANDARD 5 and STANDARD 6</p>		
<p>Measure / Required evidence: N/A</p>	<p>College response</p> <p><i>Colleges are requested to provide a narrative that highlights their organization’s best practices for the following two standards. An exhaustive list of interactions with every system partner that the College engaged with is not required.</i></p> <p><i>Colleges may wish to provide information that includes their key activities and outcomes for each best practice discussed with the ministry, or examples of system partnership that, while not specifically discussed, a College may wish to highlight as a result of dialogue.</i></p>	
<p>The two standards under this domain are not assessed based on measures and evidence like other domains, as there is no ‘best practice’ regarding the execution of these two standards.</p> <p>Instead, <u>Colleges will report on key activities, outcomes, and next steps that have emerged through a dialogue with the ministry.</u></p> <p>Beyond discussing what Colleges have done, the dialogue might also identify other potential areas for alignment with other Colleges and system partners.</p>	<p>Standard 5: The College actively engages with other health regulatory colleges and system partners to align oversight of the practice of the profession and support execution of its mandate.</p> <p>Recognizing that a College determines entry to practice for the profession it governs, and that it sets ongoing standards of practice for the profession it regulates and that the profession has multiple layers of oversight (e.g. by employers, different legislation, etc.), Standard 5 captures how the College works with other health regulatory colleges and other system partners to support and strengthen alignment of practice expectations, discipline processes, and quality improvement across all parts of the health system where the profession practices. In particular, a College is asked to report on:</p> <ul style="list-style-type: none"> • <i>How it has engaged other health regulatory Colleges and other system partners to strengthen the execution of its oversight mandate and aligned practice expectations? Please provide details of initiatives undertaken, how engagement has shaped the outcome of the policy/program and identify the specific changes implemented at the College (e.g., joint standards of practice, common expectations in workplace settings, communications, policies, guidance, website, etc.).</i> <ul style="list-style-type: none"> • As an active participant in HPRO, the College has both contributed to and benefited from initiatives designed to advance Diversity, Equity and Inclusion, modernize governance and regulatory management, understand and address regulatory changes to registration requirements, and ensure compliance with CPMF requirements. • During the reporting period, the Registrar met with representatives from other Colleges (e.g., COKO) to discuss areas of common interest and ways in which to build stronger relationships. At its June 16, 2022 meeting, Council heard from Deborah Adams, Registrar and CEO of the College of Registered Psychotherapists of Ontario, who presented a comprehensive overview of the efforts undertaken to develop and implement competency-based governance at the CRPO. (reported in the June 16, 2022 minutes, item 5.1 in the October 6, 2022 Council materials package, page 8). • Among the College’s goals and objectives is stakeholder outreach (Regulatory College/Education/Professional Association) to support professional growth and practice excellence in homeopathy in Ontario. To this end, the CHO had multiple discussions with homeopathic education programs and the 	

	<p>profession's main association to promote, among the leadership, greater awareness of the unique roles and responsibilities of each partner. This dialogue, through an environment of trust, mutual respectful and appropriate collaboration, is bringing the partners to a common understanding and commitment to pursue growth of the profession. The dialogue to date has been positive and has developed a solid foundation and commitment to explore a range of possible initiatives to encourage growth including public and profession education, and explore ways to improve patient access to care, among other opportunities. This will be beneficial to the College in increasing interest in College and Council membership. CHO will contribute, as possible, within its mandate of public protection.</p> <ul style="list-style-type: none">• Work toward completing the recommendations of the Office of the Fairness Commissioner was ongoing, with significant progress made in 2022. Quarterly meetings have been held with OFC since Fall 2022.• Additionally, the Registrar engaged in a series of one-on-one meetings with registrants to support the focus on ensuring that the public could rely on anyone practising homeopathy in Ontario to have proven themselves competent and ethical.

Standard 6: The College maintains cooperative and collaborative relationships and responds in a timely and effective manner to changing public/societal expectations.

The intent of Standard 6 is to demonstrate that a College has formed the necessary relationships with system partners to ensure that it receives and contributes information about relevant changes to public expectations. This could include both relationships where the College is asked to provide information by system partners, or where the College proactively seeks information in a timely manner.

- *Please provide examples of key successes and achievements from the reporting year where the College engaged with partners, including patients/public to ensure it can respond to changing public/societal expectations (e.g., COVID-19 Pandemic, mental health, labor mobility etc.). Please also describe the matters that were discussed with each of these partners and how the information that the College obtained/provided was used to ensure the College could respond to a public/societal expectation.*
- *In addition to the partners it regularly interacts with, the College is asked to include information about how it identifies relevant system partners, maintains relationships so that the College is able access relevant information from partners in a timely manner, and leverages the information obtained to respond (specific examples of when and how a College responded is requested in Standard 7).*
- The [System Partner Initiatives framework](#) was presented to and approved by the Executive Committee on February 15, 2022. This framework proposed two areas of activity that would fulfill CPMF requirements for system partnerships. This proposal was also discussed by Council at its June 16, 2022 meeting (see item 11 in [June 16, 2022 minutes in October 6, 2022 package](#), page 8).
- With limited human capacity to move these initiatives forward during the 2022/2023 fiscal year, these projects will be considered again in 2023/2024. These projects remain a priority.
- In addition, the CHO will increase its public engagement and response by becoming a member of the Citizen Advisory Group.

Some applicants to the College come with a wide and diverse range of education and clinical training, sometimes earned from outside of Ontario. The College's 2021 Fair Registration Practice Report to the Ontario Office of the Fairness Commissioner shows 21% of applicants who went on to become registrants received their initial education outside of Canada. The content of the education and clinical training received by applicants outside of Ontario varies from greatly exceeding the CHO requirements to falling below the complement of courses and skills training required to demonstrate the requirements laid out in Ontario Regulation 18/14 Registration, College policies and/or evidence that the applicant has been taught and evaluated on the competencies laid out in the Entry-to-Practice Competency Profile for Homeopaths Practicing in Ontario.</p> <p>The CHO has excellent rapport with the administrators of the CHO-approved programs. These schools provide transcripts and any additional support information</p>

			<p>required (i.e. training logs, supervisor reports, etc.) on a as needed and as requested basis. Sometimes this information is required if an applicant is re-entering the workforce and graduated prior to the program becoming approved. Most applicants who are program graduates from a post-secondary program in homeopathy within Canada, but outside of Ontario, come from one program in Quebec. The CHO also has an excellent rapport with that school.</p> <p>Between 2015 and 2022, the majority of applicants from outside of Canada received their education from India (57%), Pakistan (17%), the United Kingdom (9%) and the United States (7%). Typically, the homeopathy programs in India and Pakistan are medically based four-and-a-half-year degree programs followed by one year of internship. While these programs generally meet or exceed the Ontario-based program requirements, all individuals who have not graduated from an Ontario approved program must undergo a Substantially Equivalent Competency Assessment (SECA) review administered by the CHO. Additionally, the individual must provide proof of education and training along with all other registration requirements. Certification boards in India, Pakistan and Quebec oversee and validate the applicant's training and education. These certification bodies provide verification information directly to the CHO.</p> <p>All applications, regardless of the pathway to registration, must include verified proof of identification. Supporting information received from educators, supervisors, or regulators must be submitted directly from source. Applicants who have been or are currently registered with another regulatory body must request that a Certificate of Professional Conduct be issued to CHO.</p> <p>The CHO registration process also includes the following components:</p> <p>Applicants without currency in the past three years: If an applicant does not have currency, he/she may be directed to undergo a Refresher Program from a CHO approved program in Ontario. This program includes theory refreshment set to CHO entry-to-practice competency profile and clinical supervision. The program provider issues a progress report and a certificate of completion.</p> <p>Substantial Equivalence Competency Assessment (SECA): The SECA review for individuals who have not graduated from an approved post-secondary program in homeopathy includes a thorough examination of the applicant's submission package including training and education, and a comprehensive in-person interview (conducted via video call during 2021, previously the interview may have been in person). The interview is conducted by a trained assessor who is also a homeopath. The applicant must provide proof of identification prior to commencing with the interview. The SECA process can result in one of the following outcomes:</p> <ol style="list-style-type: none"> 1. Demonstration of substantial equivalence [scored 80% or more on both the theory and clinical requirements] 2. Failure to demonstrate [scored less than 80% on either the theory or clinical requirements or both] <p>Where gaps in the applicant's knowledge, skill and judgment exist, the applicant is notified of the results and is provided with a complete results report. The applicant may remedy the outcome by a. retaking the SECA interview to improve their demonstration or b. the file will be referred to the Registration Committee who provides specific instruction to the applicant on the additional education or clinical training, and the acceptable source, required to satisfy the registration requirements. The SECA process may be undertaken up to three times. If the individual is unable to demonstrate equivalence by the third attempt, the College requires the individual to provide proof of additional training or education prior to again attempting the SECA process. The SECA results can be appealed to the Registration Committee.</p>

¹ This measure is intended to demonstrate how a College ensures an applicant meets every registration requirement set out in its registration regulation prior to engaging in the full scope of practice allowed under any certificate of registration, including whether an applicant is eligible to be granted an exemption from a particular requirement.

		<p>b. The College periodically reviews its criteria and processes for determining whether an applicant meets its registration requirements, against best practices (e.g., how a College determines language proficiency, how Colleges detect fraudulent applications or documents including applicant use of third parties, how Colleges confirm registration status in other jurisdictions or professions where relevant etc.).</p>	<p>The College fulfills this requirement: Yes</p>
		<ul style="list-style-type: none"> • Please insert a link that outlines the policies or processes in place for identifying best practices to assess whether an applicant meets registration requirements (e.g., how to assess English proficiency, suitability to practice etc.), a link to Council meeting materials where these have been discussed and decided upon and indicate page numbers OR please briefly describe the process and checks that are carried out. • Please provide the date when the criteria to assess registration requirements was last reviewed and updated. <p style="color: green;">Also refer to the answer in 9.1a for information on the validation process to detect fraudulent applications or documents.</p> <p style="color: green;">CHO's criteria for applicants of full class is outlined in section 6 (1) of Ontario Regulation 18/14 O. Reg. 18/14: REGISTRATION (ontario.ca)</p> <p style="color: green;">Registration requirements, Full class</p> <p style="color: green;">6. (1) The following are registration requirements for a Full certificate of registration:</p> <p style="color: green;">1. The applicant must have,</p> <ul style="list-style-type: none"> i. successfully completed a post-secondary program in homeopathy in Ontario that is approved by Council, or another body approved by Council for that purpose, or ii. successfully completed a program in homeopathy together with other education or training which a panel of the Registration Committee considers, when taken together, to be substantially equivalent to the requirements set out in subparagraph i. <p style="color: green;">The criteria for an approved post-secondary program in homeopathy in Ontario, supported by 6.(1)1i was approved in 2015 and has remained unchanged since that time.</p> <p style="color: green;">The criteria, for the determination of applicants who are deemed to have successfully completed education and clinical training which is considered to be substantially equivalent to that of a graduate from an approved post-secondary program in homeopathy in Ontario, have undergone substantial fine-tuning since they were first introduced in 2016. In late 2018 staff undertook a review of the substantially equivalent process to make the process more transparent for the applicant while enhancing public protection.</p> <p style="color: green;">Throughout the 2020 and 2021, the College continued to work on strengthening its SECA (substantially equivalent competency assessment) review process to include a thorough interview process intended to provide a deeper understanding of an applicant's knowledge, education and training and to determine if gaps exist between the applicant's training and the College's requirements. This interview process, utilizing trained assessors, who are also homeopaths, provides the College and the public with a greater level of confidence about the entry-to-practice readiness of future registrants. Where a gap or gaps are identified, the College provides the applicant with clear direction on additional education and/or training required to demonstrate eligibility to register in Full Class. Once the applicant demonstrates substantial equivalence, they are still required to successfully complete all remaining registration requirements including the Individual Assessment (IA) process. This stronger assessment component was in place throughout 2022, during which 11 applicants completed the process.</p> <p style="color: green;">The IA, first adopted in 2014, is administered by an independent third-party psychometric assessment company. Together the substantial equivalence review</p>	

			<p>and the individual assessment requirement help to ensure registrants are knowledgeable and appropriately trained on entry to practice competencies and requirements. Discussion with the College’s third-party assessor will commence in 2023 to audit and review the process and determine if any fine-tuning is required to modernize and refresh the process.</p> <p>The substantial equivalence and the individual assessment processes has been developed in accordance with the general and specific duties outlined in the <u>Fair Access to Regulated Professions and Compulsory Trades Act</u> and supporting materials provided by the Office of the Fairness Commissioner of Ontario. The process meets both the applicant's needs for a process which is transparent, objective, impartial and fair, and the public's need for protection and confidence in their health care providers. Additional review and adjustments will be considered in preparation for the implementation of the proposed Emergency Class which will utilize a modified version of the substantial equivalence process.</p> <p>All registration requirements have been reviewed against the recent regulatory changes mandated under O.Reg. 508/22 <u>Registration Requirements</u>. CHO requirements were already aligned with the majority of the new registration requirements. In 2023, CHO is preparing to add an Emergency Class in accordance with O.Reg. 508/22, pending government approval.</p>

Measure: 9.2 Registrants continuously demonstrate they are competent and practice safely and ethically.		
c. A risk-based approach is used to ensure that currency ² and other competency requirements are monitored and regularly validated (e.g., procedures are in place to verify good character, continuing education, practice hours requirements etc.).	The College fulfills this requirement:	Yes
	<ul style="list-style-type: none"> Please briefly describe the currency and competency requirements registrants are required to meet. Please briefly describe how the College identified currency and competency requirements. Please provide the date when currency and competency requirements were last reviewed and updated. Please briefly describe how the College monitors that registrants meet currency and competency requirements (e.g., self-declaration, audits, random audit etc.) and how frequently this is done. <p>CHO's currency requirements are outlined in section 7(1) of Ontario Regulation 18/14 O. Reg. 18/14: REGISTRATION (ontario.ca)</p> <p>Terms, etc., Full class</p> <p>7. (1) Subject to subsection (2), the following are terms, conditions and limitations on every Full certificate of registration:</p> <ol style="list-style-type: none"> The member shall practise the profession a minimum of 750 hours during every three-year period, with the first three-year period beginning on the day that the member is issued a Full certificate of registration, and each subsequent three-year period beginning on the first anniversary of the commencement of the previous period. At all times the member must be certified in health care provider CPR and standard first aid. O. Reg. 18/14, s. 7 (1). <p>These requirements were last reviewed in 2014.</p> <p>Monitoring of currency requirements occurs through self-declaration once a year at renewal time. The annual reporting on actual currency hours is provides a detailed recording of the registrant's practice hours during their selected 12-month reporting period. This information is reviewed for completeness and is followed up by staff and confirmed. Additionally, staff review each registrant's practice currency over a rolling three-year period. Registrants issued a Full Class certificate of registration, who report very small or minimal practice hours are flagged for further follow-up. As the primary focus is ongoing competent and safe practice, the registrant maybe referred for peer assessment by the College's Registrar.</p> <p>Registrants are required annually to reaffirm matters of good character. The registrant has the option to provide additional information at the time of renewal. Any matter that is flagged by the registrant is followed up by staff. Throughout the remainder of the year registrants are required to declare matters of good character within 30-days of any reportable matters including professional misconduct with another regulatory body, conditions of bail, findings of guilt, etc.</p> <p>Additionally, at the time of renewal registrants are required to provide proof of renewal of their certificate in health care provider CPR and standard first aid and insurance.</p>

² A 'currency requirement' is a requirement for recent experience that demonstrates that a member's skills or related work experience is up to date. In the context of this measure, only those currency requirements assessed as part of registration processes are included (e.g., during renewal of a certificate of registration, or at any other time).

The Objects give structure to the College's role to safeguard public protection by ensuring that only those individuals who are qualified, skilled and competent are registered, and only those registrants who remain competent, safe and ethical continue to practice the profession. These programs come in the form of registration, quality assurance, patient relations, inquiries/complaints and reports, fitness-to-practice and disciplines.</p> <p>Key Result Area 2: CHO to Practice Good Governance It is important for the College's Council (which acts as a Board of Directors) to manage its Governance. The CHO creates efficiency in the work they do, and with current resources, they meet their statutory objects and regulatory mandate. With the oversight provided, the legal and ethical standing that they maintain, they uphold the reputation on behalf of the College. On behalf of the College, the Public and Registrants, the CHO Council practices good governance allowing it to flag potential issues and respond efficiently and appropriately. They make decisions with integrity and transparency through the setting and achieving of goals, training Council and statutory committee members, with monitoring of programs and activities under its legislative and legal mandate. The CHO imparts transparent communication about its performance and the College strives to effectively manage its activities, keep its stakeholders informed and fulfil its mandate.</p> <p>Key Result Area 3: CHO to Achieve Growth (Growth = Profession, Supporting Institutions, CHO Membership Levels) The College strives to achieve the growth of its membership along with keeping the organization and registrant base strong and viable. In addition to delivering its legislative and legal mandate, it practices good governance. The College endeavors to work with other Colleges and system partners, where appropriate, to help execute its mandate in an effective, efficient and/or coordinated manner to ensure it is responsive to changing public expectations. Embedded in these activities, is the added intent to improve patient access to quality care and advance the College's ability to protect the public.</p>

Part 2: Context Measures

The following tables require Colleges to provide **statistical data** that will provide helpful context about a College's performance related to the standards. The context measures are non-directional, which means no conclusions can be drawn from the results in terms of whether they are 'good' or 'bad' without having a more in-depth understanding of what specifically drives those results.

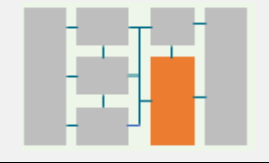

In order to facilitate consistency in reporting, a recommended method to calculate the information is provided in the companion document "Technical Specifications for Quantitative College Performance Measurement Framework Measures." However, recognizing that at this point in time, the data may not be readily available for each College to calculate the context measure in the recommended manner (e.g., due to differences in definitions), a College can report the information in a manner that is conducive to its data infrastructure and availability.

In those instances where a College does not have the data or the ability to calculate the context measure at this point in time it should state: 'Nil' and indicate any plans to collect the data in the future.

Where deemed appropriate, Colleges are encouraged to provide additional information to ensure the context measure is properly contextualized to its unique situation. Finally, where a College chooses to report a context measure using a method other than the recommended method outlined in the following Technical Document, the College is asked to provide the method in order to understand how the information provided was calculated.

The ministry has also included hyperlinks of the definitions to a glossary of terms for easier navigation.

CM 1. Type and distribution of QA/QI activities and assessments used in CY 2022*		<p><i>What does this information tell us? Quality assurance (QA) and Quality Improvement (QI) are critical components in ensuring that professionals provide care that is safe, effective, patient-centred and ethical. In addition, health care professionals face a number of ongoing changes that might impact how they practice (e.g., changing roles and responsibilities, changing public expectations, legislative changes).</i></p> <p><i>The information provided here illustrates the diversity of QA activities the College undertook in assessing the competency of its registrants and the QA and QI activities its registrants undertook to maintain competency in CY 2022. The diversity of QA/QI activities and assessments is reflective of a College's risk-based approach in executing its QA program, whereby the frequency of assessment and activities to maintain competency are informed by the risk of a registrant not acting competently. Details of how the College determined the appropriateness of its assessment component of its QA program are described or referenced by the College in Measure 10.2(a) of Standard 10.</i></p>

While future iterations of the CPMF may evolve to capture the different permutations of pathways registrants may undergo as part of a College's QA Program, the requested statistical information recognizes the current limitations in data availability today and is therefore limited to type and distribution of QA/QI activities or assessments used in the reporting period.*

Glossary

Alternative Dispute Resolution (ADR): Means mediation, conciliation, negotiation, or any other means of facilitating the resolution of issues in dispute.

Return to: [Table 5](#)

Contested Discipline Hearing: In a contested hearing, the College and registrant disagree on some or all of the allegations, penalty and/or costs.

Return to: [Table 8](#)

Disposal: The day upon which all relevant decisions were provided to the registrant by the College (i.e., the date the reasons are released and sent to the registrant and complainant, including both liability and penalty decisions, where relevant).

Return to: [Table 5](#), [Table 7](#), [Table 8](#)

Formal Complaint: A statement received by a College in writing or in another acceptable form that contains the information required by the College to initiate an investigation. This excludes complaint inquiries and other interactions with the College that do not result in a formally submitted complaint.

Return to: [Table 4](#), [Table 5](#)

Formal Complaints withdrawn by Registrar at the request of a complainant: Any formal complaint withdrawn by the Registrar prior to any action being taken by a Panel of the ICRC, at the request of the complainant, where the Registrar believed that the withdrawal was in the public interest.

Return to: [Table 5](#)

NR: Non-reportable: Results are not shown due to < 5 cases (for both # and %). This may include 0 reported cases.

Return to: [Table 1](#), [Table 2](#), [Table 3](#), [Table 4](#), [Table 5](#), [Table 6](#), [Table 9](#), [Table 10](#)

Registrar's Investigation: Under s.75(1)(a) of the *Regulated Health Professions Act, 1991*, (RHPA) where a Registrar believes, on reasonable and probable grounds, that a registrant has committed an act of professional misconduct or is incompetent, they can appoint an investigator which must be approved by the Inquiries, Complaints and Reports Committee (ICRC). Section 75(1)(b) of the RHPA, where the ICRC receives information about a member from the Quality Assurance Committee, it may request the Registrar to conduct an investigation. In situations where the Registrar determines that the registrant exposes, or is likely to expose, their patient to harm or injury, the Registrar can appoint an investigator immediately without ICRC approval and must inform the ICRC of the appointment within five days.

Return to: [Table 4](#), [Table 5](#)

Revocation: Of a member or registrant’s Certificate of Registration occurs where the discipline or fitness to practice committee of a health regulatory College makes an order to “revoke” the certificate which terminates the registrant’s registration with the College and therefore their ability to practice the profession.

Return to: [Table 10](#)

Suspension: A suspension of a registrant’s Certificate of Registration occurs for a set period of time during which the registrant is not permitted to:

- Hold themselves out as a person qualified to practice the profession in Ontario, including using restricted titles (e.g., doctor, nurse),
- Practice the profession in Ontario, or
- Perform controlled acts restricted to the profession under the Regulated Health Professions Act, 1991.

Return to: [Table 10](#)

Reprimand: A reprimand is where a registrant is required to attend publicly before a discipline panel of the College to hear the concerns that the panel has with their practice.

Return to: [Table 10](#)

Terms, Conditions and Limitations: On a Certificate of Registration are restrictions placed on a registrant’s practice and are part of the Public Register posted on a health regulatory College’s website.

Return to: [Table 10](#)

Uncontested Discipline Hearing: In an uncontested hearing, the College reads a statement of facts into the record which is either agreed to or uncontested by the Respondent. Subsequently, the College and the respondent may make a joint submission on penalty and costs or the College may make submissions which are uncontested by the Respondent.

Return to: [Table 8](#)

Undertaking: Is a written promise from a registrant that they will carry out certain activities or meet specified conditions requested by the College committee.
